TYROLIT Group A global company

As one of the world's leading manufacturers of bonded grinding, cutting, sawing, drilling and dressing tools and a system supplier of tools and machines for the construction industry, the familyrun TYROLIT company has been synonymous with superior quality, innovative spirit and outstanding service since 1919.

Day in, day out the experts at TYROLIT are busy working on solutions that accommodate the individual requirements of customers around the world; thus contributing to their business success. Some 80,000 available products set the standard in various industrial sectors.

Business units

TYROLIT offers its customers cost-efficient and "green" solutions in four business units. Moreover, with its global sales network and a team of experienced application engineers, TYROLIT provides top-quality service.

Trade

Thanks to its global sales network, in addition to premium product solutions in the three core areas of cutting, grinding and finishing, TYROLIT's Trade business unit guarantees truly customer-focused marketing support.

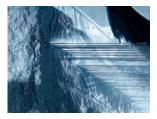

Metal / Precision

From precision machining in the engine and gear industry to the production of cut-off wheels with diameters up to 2,000 mm for the steel industry – the TYROLIT product range in the Metal & Precision business unit includes high-tech tools for a huge variety of applications.

Construction

In the Construction business unit TYROLIT is a leading system supplier of sophisticated drilling systems, wall and wire saws, floor saws and for grinding uneven surfaces such as motorways made of concrete.

Stone-Ceramics-Glass

Our customized diamond tools and grinding solutions in the Stone – Ceramics – Glass business unit cannot fail to impress through their exceptional performance and quality.

Quality and Innovation

TYROLIT is one of the world's market leaders in this sector. For us, maximum precision is paramount – both in the quality of the manufactured products and where innovation is concerned. Continuous further development and improvement of products in all business units is one of our primary corporate objectives.

Expertise for our customers

TYROLIT offers its customers a first-class service in the form of ongoing advice and support. In each of our business units a team of specialists with years of experience in the industry assists and supports our customers worldwide with individual on-site expertise.

Customized products

TYROLIT has a huge and varied product range for numerous fields of application. These include both standard products for everyday use and individually adapted, made-to-order products for customer-specific processes. Together with our customers, we find the most cost-effective solution for the task with which we are entrusted.

International production and sales locations

TYROLIT is represented in 29 countries through its own production and sales companies and cooperates in a further 65 countries with local partners.

Everyday our several hundred field service colleagues are working hard in the market alongside our end customers, in order to be able to provide them with advice and support whenever they need it. Of course, with these countless visits we constantly witness new challenges for application technology, which we view as opportunities for new products.

Sales companies in Argentina, Australia, Austria, Belgium, Brazil, Canada, China, Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, India, Indonesia, Italy, Netherlands, Norway, Poland, Portugal, South Africa, Spain, Sweden, Switzerland, Thailand, UK, UAE and the USA.

Distributors in more than 65 countries across the globe

TYROLIT production locations (sites are only named once) TYROLIT sales locations (sites are only named once; includes service centres)

Global focus

TYROLIT believes in thinking and acting globally. With a worldwide sales network currently in 65 countries and with production plants in 12 countries, we offer our customers all the advantages of a globally active company.

Local availability

Think globally, act locally – in your local language and right on your premises. This is the principle we follow as we grow hand-in-hand with our customers. Local contacts and technical distribution in numerous countries guarantee you the best possible customer support.

Customer service

A coordinated supply chain – from production to delivery – guarantees on-time delivery for customers. Moreover, the use of modern planning systems and a team of specialized customer service employees ensures orders are processed quickly and smoothly.

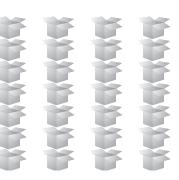

Global logistics

With 10 warehouses around the world, we ensure the best possible product availability for customers 365 days a year.

From a good idea to an excellent product

What happens at TYROLIT when we get a good idea for a new product?

First of all, our product management team comes to grips with it. We have to find out precisely what is involved. Once our product managers have analyzed all aspects and consider them to be good enough, a well-established process is initiated in which they take a leading role.

Of course, we do not leave our product managers to deal with this mammoth task on their own. To assist them, there are no fewer than 100 colleagues on hand in Research & Development. From fundamental research in the chemistry lab to questions pertaining to physics, whether theoretical or in the form of actual tests in the workshop, our employees in this department are constantly looking for new solutions.

Thus there are over 400 different abrasive types and combinations available to our product managers, which we can integrate in several hundred different bond systems.

From this unimaginable wealth of possibilities, the first test wheels are then produced. We prefer to try many variations so that we can work on a solution in a truly comprehensive way. Then testing begins. Not only is the work result tested, but also whether the relevant solution can later be produced in larger quantities. We test whether the prospective products can be produced to a consistently high level of quality, as well as important aspects such as imbalance, lateral load and bursting speed values, to ensure we produce products for our customers that not only demonstrate high quality, but are also safe.

And finally it comes to the material. But not just any material. Here too we are very precise, in order to achieve reliable and above all comparable results. Every test material therefore needs a test certificate.

Once comprehensive testing both off-hand and also with stationary machines has been completed, and the best abrasive grain and bond system have been found, we can start with production. It is not enough for us to simply start with a new product, we want to guarantee a consistently high level of quality. We owe that to our name and to our customers. For this reason, we continue to take and test samples from every production batch in order to guarantee our high quality standards.

Ultimately it is our most important promise to our customers that we can regularly offer new and excellent innovations at the highest quality level, because that is what the name TYROLIT represents.

Videos

What may often require hours of training can be explained by videos in just a few minutes. We consequently produce new product and demonstration videos on an ongoing basis in order to communicate the advantages of our products quickly and efficiently. As a premium partner, you also benefit from this. Use our videos for your next sales talk and for visits to end customers. You can find all the videos on YouTube under TYROLIT Group. Alternatively, you can also download videos direct from Vimeo.

Online

You can obtain information on our products from our website and our Apprasive app 24 hours a day and, as a premium partner, shop at our B2B Web Shop. Subscribe to our newsletter, and receive information on relevant topics such as new products, campaigns and trade fairs. Not regularly, but only when we actually have something important to say.

Support for in-house exhibitions

To assist at your in-house exhibitions, we come to your premises armed with professional materials, ensuring your end customers get the best possible information.

Joint visits to end customers

In keeping with our motto "Successful together", we accompany premium partners on visits to their most important end customers, and are at your side giving advice and support.

Training courses

With our extensive training program, as a premium partner you will always be up to date to ensure profitable sales with our products.

TYROLIT E-Learning Online learning made easy

In addition to our regular training program, we now also support you with extensive online courses. TYROLIT e-learning provides you with all the basics that can help you in your everyday sales of TYROLIT products.

Get to know the TYROLIT product range any time, anywhere at your convenience, and then test your knowledge in an online test. We especially recommend our e-learning before attending one of our classroom courses, to build up the relevant basic knowledge beforehand.

TYROLIT e-learning takes you through several stages. In the Learning section, you gain fundamental knowledge in cutting, grinding, brushing, coated abrasives and diamond tools. You can then Take a test to put what you have learned to the test, with eight different multiple-choice question sheets. Finally, complete your e-learning with a final test.

Once you have finished, you will be thoroughly familiar with the basics of conventional abrasives at TYROLIT. Ask your TYROLIT colleague today about free access to our e-learning offerings.

POS – Even with a PREMIUM product, presentation is what brings you that extra turnover!

Despite the increase in online sales, a well equipped showroom is no less important these days. On the contrary: end customers react as we do. Their first impression when they enter your showroom is what counts: if it looks clean, well organized and attractive, they simply feel more at home.

These days, the bandwidth of products in specialist industry retail is enormous. This makes it all the more important to help your staff with sales promotion in their everyday work. Not everyone can know as much about each and every product as our end customers would like.

But we have a lucrative solution to this problem: our growing range of magnetic signs and strips, which can be mounted on existing displays, make it easier to find the right product. And a self-explanatory goods presentation system is your number one shop assistant and a great advertisement for TYROLIT!

Quality lines

TYROLIT has been one of the leading manufacturers of tools for every professional and application for almost 100 years.

To make your search for the ideal tool easier, we have divided our range into three performance levels. This enables us to offer the perfect solution for every application!

- Use of the most innovative technology and the best raw materials
- Maximum comfort for the user thanks to low vibration and noise levels

CUT-OFF WHEELS FOR ANGLE GRINDERS

Cut-off wheels for angle grinders

Working with an angle grinder is one of the most important processes in the handicraft and industrial sectors for machining all types of metals. TYROLIT offers the ideal cut-off wheels for convenient and quick use with small and large angle grinders.

The benefits of our cut-off wheels in terms of innovation and economy can be clearly seen when it comes to cutting thin metal sheets and profiles. Our PREMIUM products in particular offer you the ultimate performance and lifetime, very clean cutting areas and low thermal load. This means there is only a limited amount of rework required, saving you time and money.

However, the highest priority here at TYROLIT is the health of our customers. TYROLIT cut-off wheels therefore meet the highest safety standards and contribute significantly to improving your working conditions. Reduced vibration and noise considerably improve your level of comfort while working.

On the following pages you will find the perfect tool for your requirements thanks to the uniform color code for all materials.

Grinding

Cut-off wheels

2in1 with DEEP Cut Protection for steel and stainless steel

+ Enhanced safety

The DEEP Cut protection metal bushing we have developed prevents the crown being removed from the wheel and thus a break out of the bore.

+ **Greater economic efficiency** The longer range of application means that wheel changes are reduced.

Using newly developed technology and new materials we have succeeded in taking another step towards improved user safety. The PREMIUM*** cut-off wheel with DEEP Cut Protection enables the user to achieve maximum insertion depths into the workpiece without damaging the wheel. Versatile application options
 It is ideal for small sheet metal, profile and pipe cross-sections.

 Rods and metal reinforcements
 can also be cut effortlessly.

There is no risk of sharp workpiece edges removing the crown.

CERABOND Cut-off wheels

2in1 for steel and stainless steel

- Shorter working processes +Working times are substantially reduced through improved abrasiveness.
- Improved productivity +A special structural composition offers maximum system performance.
- The CERABOND bond system developed by TYROLIT combines an easy cutting ceramic grain with a unique bond structure. This prevents premature break-out of the grain and increases the abrasiveness many times over. The CERABOND cut-off
- wheel range is particularly suitable for optimum machining of extremely hard, sophisticated workpieces and solid materials. The range stands for a long lifetime and shorter working processes with maximum economic efficiency.

Lower production costs The unique bond technology, optimized for ceramic grain, prevents the grain break-out and leads to a longer lifetime for the tool.

The product film can be found on YouTube at www.youtube.com/

Through the introduction of the 0.40" cut-off wheel with CERABOND system, the product family has been extended by a powerful member. The CERABOND product line has thus been completed and is now available in the specialist retail worldwide.

Grinding

CUT AND GRIND With DEEP Cut Protection for steel and stainless steel

27

With the introduction of the PREMIUM*** CUT AND GRIND it has become possible to perform applications such as grinding, deburring and shaping as well as cutting and plunging with only one tool. TYROLIT has refined this technology. The wheels now have a thinner width of 2.0 mm and offer

additional safety for the user with the new DEEP Cut Protection. The risk of sharp workpiece edges removing the crown from the wheel and the consequent break out of the bore is prevented.

Cut-off wheels

Super-thin cut-off wheels for stainless steel

- **Enhanced performance** +Enormous improvement in performance through a newly available specification and a new thickness of 1.2 mm.
- +Sustainability

Through the high performance levels of our cut-off wheels, wheel consumption is reduced and the environment is protected.

In order to cut nonferrous metals, the tool must have a high cutting ability. To this end, TYROLIT has developed a special formula and production method in order to achieve short cutting times with NF metals too. New specifications

prevent the clogging and dulling of the grinding wheel which used to be a common result of material abrasion.

1.2 Cut-off wheels for straight grinders

CUT-OFF WHEELS FOR STRAIGHT GRINDERS

Cut-off wheels for straight grinders

Straight grinders are always in high demand when precise results are required on difficult-to-access areas. Their versatile application options make straight grinders a popular tool.

In order to fulfil the high standards it sets for itself, TYROLIT has developed wheels for particularly quick low-burr cutting with maximum lifetimes. These high-performance tools are perfect for cutting metal sheets, profiles, pipes and rods even in difficult-to access locations. For TYROLIT, the most stringent safety standards for our cut-off wheels – as with all of our products – are of the highest priority. Reduced vibration and noise considerably improve your level of comfort while working. On the following pages you will find the perfect tool for your requirements thanks to the uniform color code for all materials.

Notes

Cut-off wheels

For steel and stainless steel

+ **Maximum economic efficiency** For fast, convenient cutting with the longest lifetime.

+ Universal use Designed for steel and stainless steel applications and delivering the best results.

The chemical purity of this tool is a requirement of machining stainless steel in order to avoid impairments to the material, such as corrosion, pitting

corrosion or a reduction in the fatigue strength. The BASIC* cut-off wheel in small diameters is designed for use on straight grinders. This tool is suitable for cutting metal sheets, profiles, pipes, rods and solid material.

CUT-OFF WHEELS FOR CIRCULAR SAW

38

Cut-off wheels for circular saw

Circular saw wheels are commonly used by the professional contractor for both metal and concrete applications.

These tools are typically used on building or job sites where the circular saw is a common tool. Tyrolit's circular saw wheels are designed to meet the demands of the professional contractor. On the following pages you will find the perfect tool for your requirements thanks to the uniform color code for all materials.

Cut-off wheels For steel

Our A30S-BF is specially designed for metal-cutting applications such as sheet metal, shapes, and profiles. Despite extreme application conditions, such as humidity, cold and temperature fluctuations, the steel cut-off

wheel from TYROLIT offers short cutting times coupled with minimal effort. Exceptionally clean, non-discolored surfaces reduce reworking tasks and working times. Developed for use on circular saws.

1.4 Cut-off wheels for gas cutting saws

GAS CUTTING WHEELS

Cut-off wheels for gas saws

Cutting materials on building sites with no electricity or limited infrastructure is a common challenge. Whether the material is reinforced steel, pipes or rails, a gas-powered cut-off grinder provides a quick and efficient solution. Gas cutting saws are particularly popular machines for cutting large crosssections and are frequently used tools.

TYROLIT offers the perfect tools for these varied cutting tasks. Whether for use on steel, stainless steel, stone or rails, thanks to the clear color coding and application tips, you will always be able to find the right product for your application and the material to be cut. TYROLIT guarantees optimum cutting results and maximum levels of safety in all situations.

Cut-off wheels

For nonferrous metals

- **Reduced working times** +Cutting times are reduced when used on aluminum, aluminum bronze, aluminum base alloys, copper, bronze, brass, nickel silver and titanium.
- **Enhanced performance** ÷ Enormous improvement in performance through a newly available specification and a new thickness of 1.2 mm.

Cut-off wheels

stationary cutting on NF metals too. New specifications prevent the clogging and dulling of the grinding wheel which used to be a common result of material abrasion.

Reduced working times +Using a special specification, clogging of the wheel is prevented and the need for wheel changes is also reduced.

As with all TYROLIT PREMIUM*** cut-off wheels, this tool has been optimized to achieve the best possible cutting ability and lifetime.

2.1 Rough grinding wheels for angle grinders

ROUGH GRINDING WHEELS FOR ANGLE GRINDERS

Rough grinding wheels for angle grinders

Working with an angle grinder is one of the most important processes in the handicraft and industrial sectors for machining all types of metals. TYROLIT offers the perfect rough grinding wheels for convenient and quick use with small and large angle grinders.

The TYROLIT range of rough grinding wheels meets the most stringent demands for cost-effective working, high stock removal rates, simple handling and above-average lifetimes. Our high-performance rough grinding wheels deliver the best results in both standard and special applications. Continuous developments, such as the introduction of the "Comfort Start" edge, with which every user can achieve optimum results right from the start, make our rough grinding wheels one of the most advanced tools in the sector.

Working safety and comfort, provided for example by the vibration-damped

VIBSTAR rough grinding wheel and the noise reducing SILENTIO, are also of great importance to us.

All TYROLIT rough grinding wheels are manufactured and tested in accordance with EN12413. Uniform color coding helps you to find the appropriate product for your application.

Rough grinding wheel LONGLIFE for steel

The PREMIUM*** LONGLIFE is a high-performance rough grinding wheel for surface and edge grinding. The 1/8" thick rough grinding wheel achieves the highest stock removal rates, such as in pipeline construction applications

The 1/4" thick LONGLIFE rough grinding wheels offer enhanced dimensional stability for welding and root welding.

Rough grinding wheel For steel

This rough grinding wheel is particularly suitable for steel applications due to its softer design. In addition, the BASIC* wheel is quick and convenient to use and requires minimal effort. This tool can be used universally and is equally

suitable for surface and edge grinding applications. These products also come in a 4 mm version. Their main application is in pipeline construction and in peripheral surface grinding.

Rough grinding wheel

CERABOND 2in1 for steel and stainless steel

- Shorter work processes
 Working times are substantially reduced through improved abrasiveness.
- + Lower production costs The unique bond technology, optimized for ceramic grain, prevents the grain break-out and leads to a longer lifetime for the tool.
- The TYROLIT CERABOND system brings almost 100 years of experience to a new generation of highest performance tools. With the rough grinding wheels from the CERABOND family, we have succeeded in

achieving an ideal combination of specially treated ceramic grain and bond structure. Thus it is possible to keep the abrasiveness and the lifetime of the wheel at the highest level. The unique bond system Improved productivity
 A special structural composition offers maximum system performance.

TYROLIT FILM

The product film can be found on YouTube at www.youtube.com/ TYROLITgroup

prevents premature grain break-out in order to guarantee the full grinding power of the individual grains. This rough grinding wheel is particularly suitable for steel and stainless steel applications.

2in1 for steel and stainless steel

- + Enhanced economic efficiency High abrasiveness coupled with a significantly longer lifetime.
- + Less work required

 $\star\star\star$

PREMIUM

The destruction of the workpiece as a result of plunging with the tool is prevented, thus avoiding rework.

This rough grinding wheel is particularly suitable for steel and stainless steel applications. Due to its softer design, the PREMIUM*** 2in1 is quick and convenient to use and requires minimal effort. This is made possible by a new bond with coarser grain and a new layer composition. What makes our 2in1 rough grinding wheel so unique is the bevelled and defined edge of the + Enhanced comfort while working With the "Comfort Start" function, plunging into the workpiece is prevented, thus making the start of the process simpler and more convenient.

TYROLIT FILM The product film can be found on YouTube at www.youtube.com/ TYROLITgroup

tool. With the "Comfort Start" edge, the user can achieve a pleasant start to grinding and the level of comfort while working is increased many times over.

Rough grinding wheel
2in1 for steel and stainless steel

This rough grinding wheel is particularly suitable for steel and stainless steel applications due to its softer design. In addition, the BASIC* 2-in-1 is quick and convenient to use and requires minimal effort. This tool can be used

universally and is equally suitable for surface and edge grinding applications. These products also come in a 4 mm version. Their main application is in pipeline construction and in peripheral surface grinding.

Rough grinding wheel For stainless steel

The high-performance rough grinding wheel has been specially designed for stainless steel applications. The PREMIUM*** INOX rough grinding wheel combines a long lifetime and the best cutting ability.

To achieve this special mixture of regular aluminum oxide and zirconium, aluminum oxide is used. This rough grinding wheel is specially designed for stainless steel applications.

Rough grinding wheel For nonferrous metals

The PREMIUM*** rough grinding wheel developed specifically for nonferrous metals prevents clogging of the tool in order to reduce loading or dulling. Even at very low pressure, the wheel achieves extremely high abrasiveness. TYROLIT's formula and production methods enable exceptionally high stock

removal rates to be obtained for nonferrous metal applications. These rough grinding wheels are available in the hard N grade for surface and edge grinding, or in the softer cutting L grade for surface grinding.

Rough grinding wheel PIPELINER for steel and cast iron

The PREMIUM*** PIPELINER has been developed for V-groove applications. Specifically in pipeline construction, it is necessary to chamfer the pipe ends in order to subsequently weld them together. As they only comprise one grain

layer, they provide for even wear on the workpiece. The PIPELINER is a rough grinding wheel suitable for steel and cast iron

Rough grinding wheel TOUCH for stainless steel and nonferrous metals

The semi-flexible BASIC* TOUCH combines the advantages of various products in one tool. The "waffle" structure enables cool grinding with good chip transport. In addition, the risk of material discoloration is reduced. The unique

structure and low weight of the TOUCH suppresses vibrations, ensuring quiet

operation and sound reduction. The wheel also facilitates ideal adaptation to workpieces for grinding, deburring and shaping work. It is also possible to cut nonferrous metals.

2.2 Rondeller® for angle grinders

Rondeller[®] for angle grinders

Working with an angle grinder is one of the most important processes in the handicraft and industrial sectors for machining all types of metals. TYROLIT has developed a special tool for use on an angle grinder that combines the product advantages of different grinding tools. It is not necessary to use any special accessories with the Rondeller[®], so simple handling is guaranteed.

Its unique geometry and stud pattern enable outstanding stock removal, cool, material-protecting grinding and ergonomic working. Vibration-free working and perfect adaptation to the workpiece is guaranteed when grinding, deburring and shaping curved surfaces.

RONDELLER®

2in1 for steel and stainless steel

- + Universal use Ideal for use on steel and stainless steel, as well as for all grinding, deburring and shaping applications on curved surfaces.
- Simple handling +Easy assembly - no need to use special accessories, such as back up pads and clamping nuts.
- The TYROLIT PREMIUM*** RONDEL-LER® combines the product advantages of different grinding tools with the easiest handling. The unique geometry

of the Rondeller® enables cool, ergonomic grinding that is kind to materials. Absolutely vibration-free use and optimal adaptation to the workpiece for all grinding, deburring and shaping applications means that curved surfaces can be perfectly machined.

Rough grinding wheel For nonferrous metals

Shape

With the TYROLIT PREMIUM*** RONDELLER® you get a tool that combines the benefits of a rough grinding, flap and fiber disc in one product. The new development means that it is now also possible to machine nonferrous metals such as aluminum, copper, brass and bronze. The tools are used in tool making, metalware production, foundries and in apparatus engineering and ship building. The cool grinding action of the RONDELLERS® reduces the risk of overheating, particularly with soft materials. TYROLIT has also developed special formulas and production methods for processing nonferrous metals in order to achieve high stock removal values and short grinding times. A specification developed in-house prevents clogging and dulling of the wheel as a result of material abrasion. This increases the lifetime of the wheel, while waste and wheel consumption are significantly reduced.

2.3 Cup wheels for angle grinders

CUP WHEELS FOR ANGLE GRINDERS

Cup wheels for angle grinders

Working with an angle grinder is one of the most important processes in the handicraft and industrial sectors for machining all types of metals. The use of cup wheels is recommended when grinding large and heavy components in particular, as they are exceptionally robust and durable.

It is particularly important to ensure that cup wheels are only used on angle grinders for 178 mm diameters. Smaller machines rotate too quickly, while larger ones rotate too slowly. In addition, a special protection cover is required to ensure sufficient levels of working safety. With cup wheels from TYROLIT you can achieve high stock removal rates and long lifetime. The composition of the cup wheels makes them suitable for large-area machining of welding seams or for grinding imperfections on concrete surfaces.

TYROLIT cup wheels can not only be used for metal machining, but also on marble, slate and granite. Uniform color coding helps you to find the appropriate product for your application.

2.4 Plugs and cones for straight grinders

Plugs and cones for straight grinders

Straight grinders are always in high demand when precise results are required on difficult-to-access areas. Their versatile application options make straight grinders a popular tool. So that there is always a solution for the numerous applications, TYROLIT offers a wide range of mounted point shapes.

Our resin-bonded plugs and cones offer you vibration-reducing solutions for the highest quality requirements. The wide range of applications also requires ceramic points that strike a perfect balance in terms of chip performance, surface finish and lifetime. Ceramic points are often used in foundries and in mold making. For fine machining, our range also includes elastic and polishing plugs and cones tailored to your needs.

2.5 Tungsten carbide burrs for straight grinders

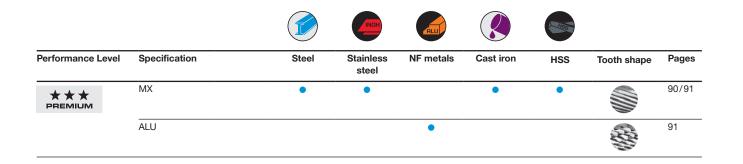

Tungsten carbide burrs for straight grinders

Straight grinders are always in high demand when precise results are required on difficult-to-access areas. Their versatile application options make straight grinders a popular tool. So that there is always a solution for the full spectrum of applications, TYROLIT offers a wide range of PREMIUM quality tungsten carbide burr shapes.

TYROLIT burrs are made from triedand-tested, high-quality cemented carbide types on the most modern CNC grinding machines. Our tungsten carbide burrs are then used on a wide range of handheld, pneumatic and electronic machines, as well as on industrial robots. Thanks to their versatility, the cutters can be used on a variety of materials.

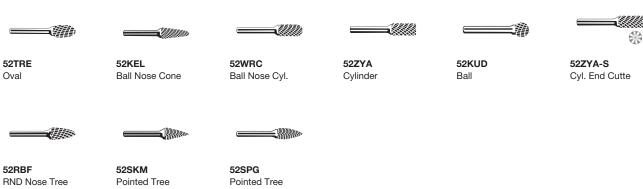

Application recommendation

Segmentations:

- ALU: For aluminum machining (standard with 8 cutting edges)
- MX: For high-alloyed steels, rust, acid and heat-resistant cast metals and plastics (diamond)

BRUSHES ANGLE GRINDER

Brushes for angle grinders

Working with an angle grinder is one of the most important processes in the trade and industrial sectors for processing all types of metals. TYROLIT offers a comprehensive assortment of brushes for angle grinders.

Brushes are generally very versatile and can be used for a wide range of applications such as deburring, cleaning welding seams or the surfaces of virtually any material. The wide assortment of TYROLIT tool brushes has the right shape, wire type and specification for every job.

Maximum speeds

The max. rpm is the speed at which the brushes can be safely used. This must not be exceeded. In most cases it is advantageous to use a lower speed in order to achieve better results.

Caution: Before each use, compare the speeds of the tool and of the machine.

For steel

Enhanced user safety
 The protective plastic flaps provide protection from undesired wire breakages and dust.

+ No restriction

The protection is transparent and therefore makes it easier to have a clear view of the surface being worked on. Even difficult-to-access areas are no longer a challenge thanks to the flexibility and pliability of the plastic.

Broad assortment
 SHIELD cup brushes from
 TYROLIT are available in various shapes and wire types.

With SHIELD cup brushes, TYROLIT offers a protective coating against dust and wire breakages combined with user-friendly use. The transparent protection allows the operator an unrestricted view of the workpiece even when performing edge and corner grinding. In addition, the plastic flaps offer a high level of flexibility, making it possible to machine difficult-to-reach places. SHIELD brushes are available in various designs and wire types, and offer the highest safety levels when working on steel applications. Our products are also frequently used to clean welding seams.

3.2 Brushes for straight grinder

BRUSHES STRAIGHT GRINDER

Brushes for straight grinder

Straight grinders are needed when precise results are required in hard-to-reach areas such as the inside of pipes. Their versatility makes them a popular tool.

That's why TYROLIT offers a comprehensive assortment of cup, round and wire brushes which can also be used on other machines, such as drilling machines. The range of applications is very wide. Shaft mounted brushes are used for surface treatment such as cleaning rust, deburring, texturing and removing layers such as paint or rubber.

4.1 Flap discs for angle grinder

FLAP DISCS ANGLE GRINDER

Flap discs for angle grinders

Working with an angle grinder is one of the most important processes in the trade and industrial sectors for processing all types of metals. TYROLIT offers a comprehensive assortment of flap discs for this purpose.

Whatever the application and whichever shape you prefer: we have the right product for you. Since TYROLIT always puts your health first, we offer flap discs with a core made from natural fibers, which can even be trimmed. Innovative and precisely adapted to the application. That's TYROLIT for you! On the following pages you will find the perfect tool for your requirements thanks to the uniform color code for all materials.

TYROLIT FILM

The product film can be found on YouTube at www.youtube.com/ TYROLITgroup

Shapes

27A Flap disc

Straight design with fiberglass core. This shape ensures optimum use of the abrasive cloth with a grinding angle of $0-15^\circ$.

Core made from natural fibers for easy trimming-straight.

Straight design with plastic core. This shape ensures optimum use of the abrasive cloth with a grinding angle of $0-15^{\circ}$. The core can also be reset in order to use the abrasive cloth completely.

29A Flap disc

Depressed-center design with fiberglass core. This shape creates the perfect angle of $15^{\circ}-20^{\circ}$.

Application recommendation

Grinding

LONGLIFE C-TRIM

For steel and stainless steel

- + Longest lifetime The PREMIUM*** LONGLIFE C-TRIM offers the longest lifetime with consistent abrasiveness and performance.
- Robust construction
 Through the increased number of closely spaced flaps, this disc can withstand even the highest loads.

 + 100% wheel usage The LONGLIFE C-TRIM can be easily trimmed by the plastic core, which enables 100% disc usage. The disc can easily be reset at edges so that new cloth can always be used for grinding.

Thanks to its new design, the PRE-MIUM*** LONGLIFE C-TRIM ensures an excellent stock removal rate and consistent results with 100% use of the disc thanks to the trimming option. You will attain unbeatable value in terms of lifetime. The LONGLIFE C-TRIM can be used on high alloyed steels and stainless steel, as well as on unalloyed and low alloyed steels. Problem-free welding, and edge and surface grinding, particularly when used

on powerful angle grinders. Thanks to its compact design, a long lifetime is guaranteed during deburring of sharp edges on thin metal sheets.

# Flap disc

CERABOND flap disc for stainless steel

Enhanced abrasiveness
 A new and broader PREMIUM
 cloth and the CERABOND bond
 system offer high stock removal on
 the workpiece.

Enhanced economic efficiency

Thanks to the self-sharpening ce-

ramic grain, the CERABOND flap

disc is also ideal for demanding

grinding jobs.

44

We at TYROLIT always endeavour to bring our customers innovative products and a comprehensive assortment. For this reason, TYROLIT has now extended the CERABOND

family to include the new CERAMIC

flap discs. A unique bond system

combined with a high-performance PREMIUM cloth offers the operator greater abrasiveness. This flap disc is particularly suitable for stainless steels and demanding grinding applications. In addition, the unique bond system prevents premature

#### Flap disc For nonferrous metals

With the specification developed specifically for nonferrous metals, smearing and dulling of the flap disc is prevented. The ceramic grain promotes selfcleaning and sharpening of the disc during material abrasion. This tool offers convenient and high-performance results on difficult-to-grind materials such as aluminum, aluminum bronze, aluminum base alloy, copper, bronze, brass and nickel silver.

4.2 Fiber discs for angle grinder

FIBER DISCS ANGLE GRINDER

Fiber discs for angle grinder

For a number of years, in the coated abrasives range, TYROLIT has offered fiber discs and back up pads for all common and not-so-common grinding jobs.

Fiber discs are used when it is necessary to carry out rough grinding or derust or deburr surfaces. TYROLIT believes in the importance of flexibility and ease of use, and offers a very wide assortment for every conceivable application. The discs come with all accessories needed for assembly. TYROLIT has also developed a more environment-friendly version. Our JUTE DISC, made from eco-friendly jute fiber, is used without any additional core and, being trimmable, offers maximum stock removal right to the very end. Try it for yourself!

Notes

ZA-P48 V vulcanized fiber discs

For steel and stainless steel

+ Longest lifetime Resistant zirconium aluminum oxide and a coolant layer deliver maximum removal rates and the longest lifetime.

+ **Maximum stock removal** The optimized backing and zirconium aluminum oxide result in an abrasive product with a maximum stock removal rate.

+ Maximum economic efficiency Excellent price-performance ratio

Using fiber discs is a very simple and quick solution for removing material. A low level of vibration means the tools are convenient to use. This fiber disc has been designed for use on steel and stainless steel, and is made of a zirconium aluminum oxide mix. This fiber disc is available from our assortment in grit sizes 24 to 120.

A-P02 V vulcanized fiber discs PREMIUM For steel and aluminum

Using fiber discs is a very simple and quick solution for removing material. A low level of vibration means the tools are convenient to use. This fiber disc has been designed for general use and is made of an aluminum oxide mix.

It can be used for outstanding results on steel and nonferrous metals. This fiber disc is available from our assortment in grit sizes 24 to 120.

ROUGH CLEANING WHEEL ANGLE GRINDER

Rough cleaning wheel for angle grinder

Working with an angle grinder is one of the most important processes in the trade and industrial sectors for processing all types of metals. Would you like to remove rust, paint and varnish with a minimum of effort? Or do you need to prepare surfaces for welding, soldering or anodising?

The highly porous nylon fibers are evenly treated with aggressive abrasives and are able to meet any challenge. All of our rough cleaning discs resist loading or smearing and offer long life with an even grinding pattern, but also low heat generation and quiet, stress-free working.

4.4 SCM – Surface Conditioning Material for angle grinder

1:44

SCM ANGLE GRINDER

SCM discs for angle grinders

Working with an angle grinder is one of the most important processes in the trade and industrial sectors for processing all types of metals. TYROLIT now offers the SCM product assortment for use with angle grinders as well.

Surface Conditioning Material discs combine excellent cutting ability with long tool life, so that you can achieve optimum surface quality. This saves you two or three work steps. From simple deburring work without workpiece deformation to perfect surface finishing, SCM can be used universally. With a wide range of grain sizes, from extra coarse to very fine, TYROLIT products are suitable for many different applications. Our discs offer another special feature: thanks to the removable center hole, our discs can be mounted on the three most popular back up pads. Try it for yourself!

POLISHING PROGRAM ANGLE GRINDERS

Polishing program for angle grinders

Working with an angle grinder is one of the most important processes in the trade and industrial sectors for processing all types of metals. TYROLIT offers an optimally tailored package for polishing metal.

There are many suppliers of polishing accessories. But anyone who has ever polished knows how important it is that all components should be perfectly matched to one another. With TYROLIT you can get everything you need from one source. You can tell how perfectly our products are matched from the

fact that you can get a mirror finish in only three steps – without unwanted discoloration due to overheating.

TYROLIT PREMIUM*** Polishing Program

Three steps to a perfect mirror finish

+ Preparation

Preparing the untreated workpiece

To prepare the untreated material and get a mirror finish, you need:PREMIUM*** fiber discs ZA-P48Page 148PREMIUM*** 2in1 flap discsPage 135Our recommendation: grit size 120 or 80 depending on the material

+ Step 1

Remove rough scratch marks using the PREMIUM*** CONDITIONING disc.

It removes all rough scratch marks from the surfaces to be machined. A multi-dimensional flap design reduces clogging and prevents unwanted material discoloration. **Recommendation:** "Medium" grain

+ Step 2

Prepare for polishing with the PREMIUM*** PRE-POLISH disc

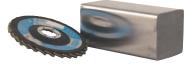

This provides optimum polishing preparation. The disc adapts flexibly to the material surface.

Recommendation: "Fine-P" grain

+ Step 3

Polish with the PREMIUM*** POLISH disc

This allows you finally to achieve a perfect mirror finish. Different grinding pastes enable processing of different materials, such as steel, stainless steel and nonferrous metals. **Recommendation:** SHF with "S-POLISH" polishing paste

CONDITIONING For steel and stainless steel

172

With the PREMIUM*** CONDITIONING wheel you can remove all rough scratch marks from the surface before commencing the polishing process. The three-dimensional flap design reduces clogging of the wheel to a

minimum. Using the wheel also prevents discoloration on the workpiece caused by high heat build-up. The tool has been specially developed to achieve the best results even on non-adjustable angle grinders.

Shape		Type no.	Dimension	Specification	RPM	PU
	28PCA	742157	4 1/2"x7/8"	MEDIUM	4	5
		742153	5"x7/8"	MEDIUM	3,6	5

PRE-POLISH For steel and stainless steel

To prepare surfaces for polishing, you require a sturdy, high-quality tool. The PREMIUM*** PRE-POLISH comprises several layers of abrasive fabric to achieve a long lifetime and sturdiness. This allows the tool to be used for smaller deburring jobs as well. The tool has been specially developed to achieve the best results even on non-adjustable angle grinders.

	Shape		Type no.	Dimension	Specification	RPM	PU

 $\star\star\star$ PREMIUM

POLISHING PROGRAM

Three steps to a mirror finish

Remove rough scratch marks using the PREMIUM*** CONDITIONING disc. A multidimensional flap design reduces clogging and prevents unwanted material discoloration.

Step 2 ÷

Prepare the surface for polishing using the PREMIUM*** PRE-POLISH. The disc adapts to the material surface, providing the perfect basis for polishing.

With the TYROLIT POLISHING PROGRAM you can achieve the perfect high gloss surface in just a few steps. Preventing clogging of the wheels provides an aboveaverage lifetime. Exceptionally cool grinding due to special flaps ensures outstanding surface finishes.

Exceptionally high levels of work safety due to low heat build-up, minimal formation of dust and quiet operation.

Step 3

Using PREMIUM*** POLISH during the last step creates the perfect mirror finish. Different grinding pastes enable the machining of different materials.

4.7 Quick-Change Discs for mini angle grinder

QUICK CHANGE DISCS ANGLE GRINDER

Quick Change Discs for mini angle grinder

Quick Change Discs are easy to use, without assembly tools being required. Easy handling on the mini angle grinder saves you a lot of time in your day-to-day work and increases your productivity.

A comprehensive assortment offers high-quality products for general grinding work, including fine surface finishing. Two different mountings cover the main fixing systems. Type R can be used for Lockit, PowerLock III and Roloc TR mountings, type S for SocAtt, PowerLock II and Roloc TSM. Another special feature of the S type mounting is that it is made from nylon, making it immune to rust and other types of contamination. TYROLIT offers Quick Change Discs in a wide range of grit sizes for different materials. Take a look at our wide-ranging assortment and see for yourself.

CA-P93 PE Y QUICK-CHANGE DISC

For steel and stainless steel

Thanks to its high level of abrasiveness, you can achieve high stock removal on the workpiece.

+ Maximum stock removal rates

+ Broad assortment

The discs are available in two diameters with different mounting types. Grit sizes 36 to 120 are suitable for all grinding tasks.

With TYROLIT QUICK CHANGE DISCS you can save a considerable amount of time. This specification delivers maximum stock removal rates at the same time as a long lifetime. This is achieved by combining the zirconium and ceramic aluminum oxide with a three-layer product structure. In addition, this product also delivers a high level of stability, low grain break-out and enhanced edge stability.

The robust three-layer design and reduced grain break-out make this

a durable and efficient tool.

Longest lifetime

A-P01 PE Y QUICK CHANGE DISC

For steel, nonferrous metals, plastic and wood

With TYROLIT QUICK CHANGE DISCS you can save time and increase productivity. They provide easy handling and can be used without the need for any additional mounting tools. Our QUICK CHANGE DISC assortment

includes discs for general grinding tasks on any material. Our two different types cover the main mounting systems.

SCM QUICK CHANGE DISC

For steel, stainless steel, nonferrous metals, plastic and wood

- Reduces working times
 The working time is significantly
 reduced through the long lifetime
 and the saving of one to three
 work steps.
- Comprehensive assortment
 The SCM range currently includes discs in the most varied of sizes and specifications.

With the new TYROLIT SCM program, we are now taking a further step towards economic efficiency. Simple handling and mounting save you time. With SCM, the machining time of the workpiece can now be greatly reduced. A saving of one to three work steps is thus the key benefit. Thanks to the quick and high stock removal rate, applications such as the reduction + Noticeable cost reduction Fewer work steps also means reduced tool costs.

of surface roughness, removal of discoloration, smoothing of surfaces and the cleaning and removal of weld seams can be realized.

Rough cleaning wheel For steel, stainless steel and PVC

With the TYROLIT rough cleaning wheel for mini angle grinders you can effortlessly remove rust, paint, lacquer and underbody sealant. The porous nylon fibers, treated with aggressive abrasives, meet any challenge. At the

same time, it prevents smearing and loading of the disc. This wheel offers the user quiet, non-strenuous grinding coupled with low generation of heat.

QUICK CHANGE DISC unitized wheels

Universal use

+ High flexibility

Particularly well suited to the time-saving machining of difficult-to-reach places.

This product is extremely versatile and can be used for deburring, removal of scratches, fading, glazing, finishing and machining of welding seams.

The unitized wheels from TYROLIT are ideally suited to the machining of small surfaces and corners. The soft surface of the product does not alter the surface geometry of your workpiece in any way and always achieves the desired structure. Application areas are primarily the deburring, cleaning, fading, finishing and machining of welding seams. Cool grinding and low clogging of the wheel result in a long lifetime for the product.

High economic efficiency

+

Compact wheels offer increased safety and especially cool grinding compared to other deburring tools.

4.8 Spindle-mounted fleece flap wheels and mounted flap wheels for straight grinder

Spindle-mounted fleece flap wheels and mounted flap wheels for straight grinders

Straight grinders are used when you need to work precisely in hard-to-reach locations. Especially when used in conjunction with TYROLIT spindle-mounted fleece flap wheels and mounted flap wheels, they are a flexible tool for producing optimum workpiece contours.

The fan-shaped, abrasive grain flaps of the mounted flap wheels allow precise work on all surfaces. They can be used not only on electrical but also on pneumatic straight grinders. The TYROLIT assortment also includes a large number of spindle-mounted fleece flap wheels in different shapes and designs. They are highly adaptable and ensure that no changes occur to the surface integrity. Spindle-mounted fleece flap wheels are available with or without embedded abrasive.

Mounted flap wheels

For steel, stainless steel and nonferrous metals

+ High flexibility

+ Less work required

Greater precision is made possible as the flaps adjust flexibly to the contours of each workpiece.

The grinding of small and diffi-

cult-to-reach areas, for example in container construction and apparatus engineering, is not a problem for TYROLIT mounted flap wheels.

- Universal use TYROLIT mounted flap wheels can be used on both pneumatic and electric machines for different materials.

190

These tools adapt optimally to every workpiece contour thanks to their flexibility. The radially arranged flaps of the mounted flap wheels can be

used on various materials and permit precise work for different applications, such as matting, pre-polishing and the cleaning of surfaces. The highly flexible flaps also make light work of machining hard-to-reach areas.

4.9 Rolls for hand sanding

a

Rolls for hand sanding and superfinishing

Any kind of surface finishing requires thorough preparation. This can be done by hand or using an orbital sander.

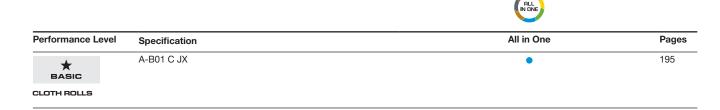

Wood, paint or lacquer are usually abraded by hand. Deburring work can also be accomplished by hand. However, for perfect intermediate sanding, we recommend using an orbital sander. This also allows smooth finishing of coatings and smoothing of composite materials. For jobs such as these we offer abrasive rolls in a wide range of designs, such as cloth, paper and fleece rolls. They allow easy and flexible working on virtually any material.

Shapes

Roll

Application recommendation

Grinding

*	Cloth rolls A-B01 C JX
BASIC	Universal use

With flexible cloth rolls from TYROLIT you can machine almost any material. When finishing surfaces, preparation either by hand or using an orbital sander is required. When machining wood, paint and lacquer,

TYROLIT recommends BASIC* cloth rolls for hand-guided grinding. For finishing coatings, smoothing and cleaning composites, and for clean intermediate grinding, we recommend cloth rolls on an orbital sander.

4.10 Sheets for hand sanding

:2

Sheets for hand sanding and superfinishing

Any kind of surface finishing requires thorough preparation. This can be done by hand or using an orbital sander.

Wood, paint or lacquer are usually abraded by hand. Deburring work can also be accomplished by hand. However, for perfect intermediate sanding, we recommend using an orbital sander. This also allows smooth finishing of coatings and smoothing of composite materials. For jobs like these we offer abrasive sheets in a wide range of designs, such as cloth, paper and fleece rolls. They allow easy and flexible working on virtually any material.

Universal use

With highly flexible cloth sheets from TYROLIT you can machine almost any material. When finishing surfaces, preparation either by hand or using an orbital sander is required. When machining wood, paint and lacquer, TYROLIT recommends the BASIC* cloth sheets. However, our products can also be used for finishing coatings, or smoothing and cleaning composites.

Fleece sheets

Universal use

+ Long lifetime

Thanks to 100% impregnation, the abrasive grain is not only located on the surface, but also inside the fleece.

+ Universal use

POLISH

The assortment offers a wide selection of possible uses on all common materials.

+ Flexible use The abrasive fabric adapts perfectly to any workpiece surface.

Our fleece sheets are used for cleaning and processing surfaces using orbital sanders or for hand-guided grinding. A wide range of specifications offer the user a variety of surface finish options. The assortment extends from coarse specifications for cleaning weld seams through to ultra-fine and polishing fleece.

BENCH GRINDING WHEELS

Bench grinding wheels

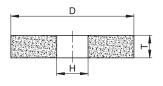

The bench grinder is a versatile machine used in many workshops for machining various materials. The TYROLIT range of bench grinding wheels therefore contains the right wheel for every material.

The wheels with the universal application specification impress in particular through their smooth running and easy handling. A reduction bush set is included in each package for proper assembly. The packaging itself is suitable for stacking on racks and thus saves space and storage costs.

Bench grinding wheels, conventional ceramic For non and low-alloyed steels

1

Vitrified bonded bench grinding wheels are primarily used in workshops and repair companies. They can be used universally for grinding and sharpening various components. The tailored specifications enable them to be used for a wide range of applications, from coarse to fine grinding. These wheels are supplied in packaging suitable for retailers so that they take up minimum space in storage. A reduction bush set is included in the packaging or can be reordered.

Bench grinding wheels, conventional ceramic For tungsten carbide and cast iron

When sharpening solid carbide or tungsten carbide tipped tools, only wheels with silicon carbide specifications should be used. Due to their special grain shape you can achieve good results even on extremely hard workpieces. This wheel can also be used for cast iron. A reduction bush set is included in the packaging or can be reordered.

Safety

Cutting

Notes

SafetyBrand TYROLIT

Our aim was and is to make our products even safer for our users:

Through our work as the founder member of the "Organisation for the Safety of Abrasives (oSa®)", through close cooperation with the safety authorities and through practical communication with our users all over the world.

aim of oSa®

The main aim of oSa® is defined in terms of absolute protection for the users of grinding tools, whereby members undertake to provide a consistently high level of quality, adopt a rigorous approach towards quality assurance and strive to develop new, improved standards of safety.

TYROLIT Quality Management System

The TYROLIT quality management system has been certified to ISO 9001:2000 by an external authorized body for the entire production area. Production is carried out in accordance with European Standards:

- EN12413 for grinding wheels made of bonded abrasives
- EN13236 for grinding wheels made of diamond or boron nitride
- EN13743 for special abrasives on an underlay such as vulcanized fiber grinding wheels,
- flap grinding wheels, flap discs and mounted points.

On account of the fact that in the approval principles (EN-Standard) very high requirements are set on the grinding tools concerning defined technical grinding parameters, TYROLIT basically delivers all grinding tools corresponding to these principles. As a result we guarantee a constantly high safety level, also in countries without compulsory approvals.

Final Inspection

TYROLIT is constantly doing final inspections concerning imbalance, bursting tests, cutting & grinding tests according to EN12413.

Resin bonded products undergo a final inspection regarding a visual and identification test, a geometry, imbalance, bursting and side load test as well as a control grinding and cutting process.

Resin and ceramic bonded products undergo a final inspection regarding a visual and identification test, a geometry, imbalance, bursting and side load test as well as a test run, a sound test.

Safety

The following plays an equal part when it comes to safety when grinding: machine manufacturer, grinding wheel producer and user.

Grinding wheels are subject to a high load during the grinding process. This is why grinding machines, grinding bodies, handling and application must be optimally harmonized to ensure safe grinding. For the grinding machines, it is generally important to observe the machine conditions and the stipulation of the protection cover.

Whereas the manufacturer implements the safety measures in line with regulations in relation to the grinding machine and grinding wheels, the user is responsible for safety when grinding through use of the grinding machine for the intended purpose, as well as through correct handling and application of the grinding wheels.

the following must be observed:

- Checking of grinding bodies on delivery
- Handling and storage of grinding bodies
- Labelling, synchronization with machine data
- Checking of grinding wheels prior to clamping
- Clamping methods for grinding wheels
- Test run of grinding bodies prior to start-up
- Eye protection and protective clothing (see also FEPA safety code)

Storage of the grinding wheels

Grinding wheels are to be stored in suitable racks or containers so that they are not damaged and so that it is easily possible to remove wheels without disturbing the storage setup. Older stock should be used first.

During storage, the following must be noted

Store the grinding wheels in a dry, rust-free condition and do not expose grinding wheels to large temperature fluctuations.

Storage for different types of grinding bodies

- Store cut-off wheels on a level underlay without intermediate layers and weigh them down with a steel or cast iron plate
- Store large straight grinding wheels in an upright position and make sure they cannot roll away
- Stack cylinder wheels, cylindrical grinding discs and grinding plates using soft intermediate layers
- Stack grinding discs, shape 11, in each cases faces or bases together
- Store small grinding wheels in suitable containers

Checking of grinding wheels on delivery

Check packaging on delivery. If damage is visible on the packaging, the grinding wheel should be checked particularly thoroughly for any possible transport damage.

Identification of the grinding wheels

The purpose of the identification is to give people, in particular those who carry out the clamping of the grinding wheels, information for safe use and proper application.

Grinding wheels may only be used if they are identified with the following minimum information

manufacturer,

dimensions of grinding wheel,

- material (at least the type of bond),
- maximum permissible RPM of new grinding wheel and maximum operating speed in m/s.

The user is obliged to match the machine speed to the maximum permissible speed given in the identification.

215

Checking of grinding wheels prior to clamping

Each time before clamping, the grinding wheels must be cleaned and checked for damage by means of visual inspection.

The sound test should be repeated. Damaged grinding wheels must not be mounted.

For the sound test, lightweight grinding wheels are pushed onto a mandrel or shaft, heavy grinding wheels are placed on a firm floor.

The grinding wheel is tapped with a non-metal object at several points.

An undamaged grinding wheel gives a clear ring, while a damaged on gives a dull or clanking sound.

All contact surfaces on grinding wheels, intermediate layers and wheel flanges must be level (flat) and be free from foreign bodies. Foreign particles between grinding wheels and wheel flanges create pressure points and stresses, which can lead to breakage of the grinding wheel.

Clamping methods for grinding wheels

Depending on the type of machine and grinding method, as well as the grinding wheel shape, a distinction can be made between the following clamping methods

- Mounting in the central bore using wheel flanges
- Mounting using embedded fixing elements
- Mounting using support plates
- Mounting using clamping head

Mounting in the central bore using wheel flanges

A distinction should be made between the following wheel flange types for central bores

- recessed wheel flange
- straight wheel flanges for portable grinding machines
- special flanges
- stepped flanges
- locating flanges and tapered wheel flanges.

The purpose of the wheel flange is to transfer drive forces. Therefore, they must be in such a condition that there is no deformation of the wheel flange during clamping. The contact surfaces must be level (flat) and must not show any burring, and the run-out of the grinding wheel must be safeguarded. Only wheel flanges that have the same external diameter and the same shape on the contact side may be used. They must be recessed so that only a ringshaped area of the wheel flange is on the surface.

Clamping using embedded fixing elements

The grinding wheels are fixed using embedded fixing elements on the grinding machine. Examples of this are the clamping of cylindrical and taper cup wheels, or the fixing of mounted points with embedded steel shafts in collets on portable grinding machines.

Clamping of grinding wheels on support plates

The grinding wheels are either cemented or fixed with inserted nuts.

Clamping of grinding segments in clamping heads

Grinding segments are clamped to one grinding unit (segment head) in clamping heads. On the contact surfaces between the grinding segments and the clamping pieces, adhesive strips can be placed on the grinding segments to avoid stresses in the grinding segments.

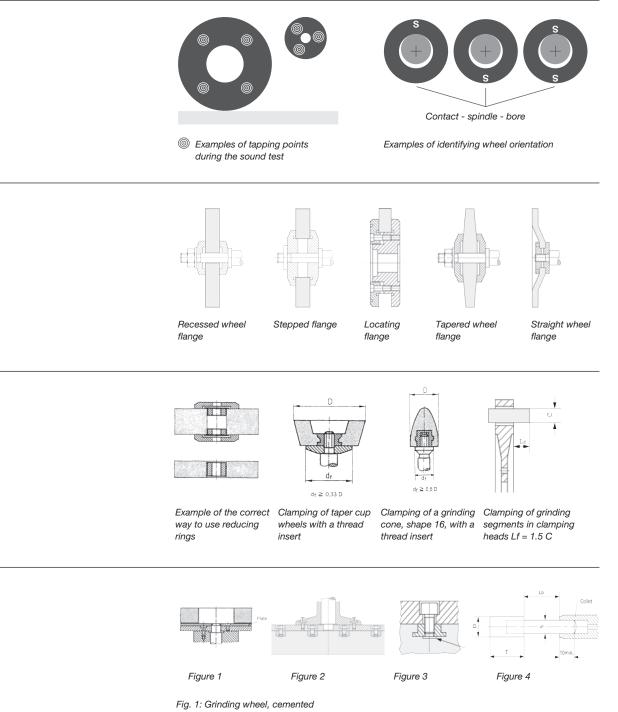

Fig. 2: Grinding wheel with inserted nuts

Fig. 3: Correct bolt connection, bolt end must not touch the base of the grinding wheel

Fig. 4: Clamping of mounted points

Test run prior to start-up

Every standard grinding wheel (D greater than 80mm) must undergo a test run at maximum operating speed before being used for the first time and after every re-mounting.

The duration of a test run for grinding wheels on portable grinding machines is 30 seconds and one minute on all other grinding machines.

The test run may only be carried out once the danger zone has been secured and if applicable, the machine guard is in place. The grinding wheel can only be used for the intended work once the test run has been passed without complaint.

Eye protection and protective clothing

All grinding tasks where people are at risk from flying particles off grinding wheels or workpieces must only be carried out using eye protection (safety glasses) and when necessary, other protective clothing (e.g. leather apron and leather gloves).

Summary

The most important points for safe use of grinding wheels are summarized again below:

- Adjustment of the machine data to the identification data
- Checking of grinding wheels prior to mounting
- Mounting carried out by skilled people
- Checking of the functionality of the machine guard
- Test run of grinding wheels prior to grinding work
- Personal safety

Safety information

Do's & don'ts

- Handle and store grinding tools carefully; use the oldest tools first.
- Prior to mounting or use, grinding wheels must be cleaned and undergo a visual check for cracks or possible damage.
- Ceramic bonded grinding tools must undergo a sound check before mounting.
- Make sure that the speed of the machine (RPM) does not exceed the maximum operating speed specified on the packaging or on the abrasive.
- Ensure that the bore of the grinding tool with or without thread – fits the shaft of the machine perfectly; and that the wheel flanges are clean, flat, the same size and suitable for the grinding tool to be clamped.
- As intended or supplied, use the intermediate layers between the grinding wheel and wheel flanges.
- Only use machines with protection/guards and ensure their proper condition and fixture before the machine is switched on.
- After each mounting, carry out a test run for at least one minute at the operating speed and ensure machine guard is mounted correctly. In doing so, ensure that any fragments would not be able to hit you or someone else in the event of a possible breakage.
- Eye protection is always recommended for all grinding processes. For off-hand grinding, protective goggles or a safety mask is recommended.
- When working with cut-off or roughing wheels, ensure that the air supply and protective measures sufficiently correspond with the material to be processed. Suitable extraction systems should be fitted for all dry grinding processes.
- Only use machines that are also suitable for grinding tools with hub.
- Before stopping the machine, cut off the supply of cooling lubricant and remove the excess cooling lubricant from the grinding wheel.

- x Do not use abrasives that are exposed to particularly humid/ wet conditions or high temperatures prior to mounting.
- × Never use abrasives that have been dropped, damaged or that look like they would not be fit for purpose.
- × Never exceed the maximum permissible operating speed specified.
- × Do not use wheel flanges with surfaces that are not free of foreign bodies (e. g. grinding swarf), flat or burrfree.
- × Do not tighten the clamping device or wheel flange too much.
- X Do not use recessed wheel flanges or flanges with recesses for grinding discs or cones.
- × Never use force when clamping and do not make any changes to the grinding tool.
- × Only use one-way adapters (hubs) once.
- X Only switch on the machine when the protection cover is correctly and securely fixed (machine guards or covers should be set in such a way that they divert sparks and grinding particles away from the body).
- × Only start the machine if there is no contact between the workpiece and the grinding tool.
- Never work with grinding tools without sufficient air supply (never without breathing apparatus and ear protection, particularly in enclosed spaces) and without personal safety equipment (see pictogram).
- × Use a suitable grinding tool an unsuitable product can create excessive grinding particles and dust.
- × Avoid mechanical damage to the grinding wheel as a result of force effects, jolting or heating.
- × Never use grinding machines in an improper condition or that contain faulty components.
- X Do not use cut-off wheels for grinding work (do not exert a lateral load on any cut-off wheels of shape 41 or 42).
- × Never mount more than one grinding tool on one shaft.

Speed recommendations

Rotational speeds and peripheral speeds depending on the external diameter Ø=D of the grinding wheels.

	Rotations n per minute min-1 depends on external diameter D of grinding wheel and the maximum operating speed V _s										
	Maximum operating speed V _s in m/s
