FACTSHEET 2013

TYROLIT

SERVICES AND INDUSTRIES

Metal | precision

From the machining of semi-finished products to the precision grinding of engine components, from cut-off wheels with a diameter of 2000 mm to the superfinishing of medical implants - the product portfolio of TYROLIT includes high-tech tools, machines and the development of innovative solutions for every conceivable grinding requirement.

Construction industry

Whether drilling, wall or wire-sawing, joint-cutting, grooving, grinding, or providing solutions for special projects such as tunnel expansions, offshore applications and decommissioning nuclear power stations - the diamond tools, machines and specially tailored system solutions from TYROLIT, satisfy the most demanding requirements for efficient processing, cutting and breaking up of concrete.

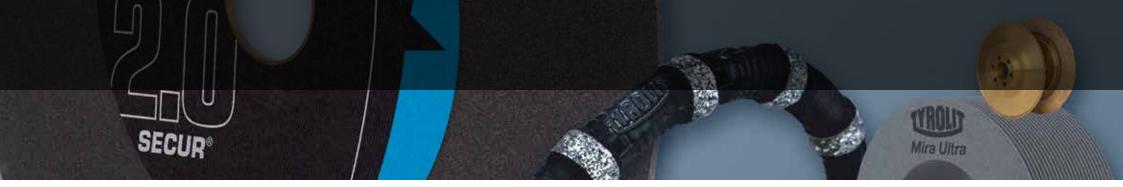

Stone | Ceramics | Glass

The range of diamond tools and grinding solutions of TYROLIT impresses with its unrivalled performance and quality in the machining of natural and engineered stone, ceramics and glass. For the most demanding requirements in the fields of cutting, calibrating, polishing, profiling and drilling - the output is unique - made by TYROLIT.

Trade

Together with our distribution partners all over the world we provide professional end users with Premium product solutions in the areas of cutting, grinding and surface treatment. Our market-leading innovations and our customer-focused marketing support are adding a significant contribution to our partners' business success. We understand it as our responsibility to act in a sustainable way, constantly improving end user working conditions and minimizing environmental impact.

TYROLIT TODAY

As one of the world's largest producers of grinding, cutting, sawing, drilling and dressing tools as well as a provider of tools and machines, TYROLIT is synonymous with high-quality, years of experience and innovative solutions. Our range of around 80,000 products sets new technological standards in a whole host of different industries.

There are many reasons for our success – but one stands out: the people in our company make it possible. Experts at TYROLIT, who are renowned for mastering a wide variety of challenges, are well respected partners worldwide when it comes to developing new and innovative solutions.
